# 8000 Series Table

## Assembly Instructions

### Tools Required for Assembly:

- 3/8" Ratchet
- 1/2" Socket
- 3" Extension
- Phillips Screwdriver \*

### Hardware Included:

- 8 x 5/16" Bolts
- 8 x Split Ring Lock Washers

### Step 1

Place the table top-side down on a clean non-scratching surface. The packing carton is ideal to flatten and use for this purpose.

Side aprons were attached to the underside of the table top at the factory.

### Step 2

\* If your table has adjustable legs, set them all to the desired height before proceeding.

### Step 3

Position the Leg Retaining Plate (A) inside the Table Leg (B) being sure to align the holes.

Place the Table Leg into the corner of the Metal Table Frame (C).

Align the holes in the Leg Corner Bracket (D) with the holes in the Table Leg and Leg Retaining Plate.

Insert the Bolts (E) with the Lock Washers through the holes in the Leg Corner Bracket and the Table Leg. Thread the Bolts into the Leg Retaining Plate and tighten securely.

Repeat this procedure with the remaining legs.

### Step 4

With a helper, turn the table right-side-up. Adjust the swivel-glides to level the table.
